Professional Summary

BCA graduate in 2026 with hands-on experience in AWS cloud infrastructure, including Amazon EC2, S3, IAM, VPC, Route 53, load balancing, backup, and disaster recovery concepts. Built and deployed an HTML and CSS website using Amazon S3 and configured DNS concepts using Route 53. Currently pursuing Cloud Computing and DevOps training in Linux, Python, Git, GitHub, CI/CD concepts, and cloud operations. Strong foundation in SQL, DBMS, troubleshooting, technical documentation, process improvement, and customer-focused support. Seeking an entry-level AWS Connect Support Engineer or Cloud Support role focused on contact-center configuration, integrations, reporting, troubleshooting, and cloud-based operations.

Education

Bachelor of Computer Applications (BCA)	2023–2026
S.D.M. College (Autonomous), Ujire, Karnataka	78%
Pre-University Course (PUC)	2023
Ascent PU College, Chitradurga	95.50%
SSLC	2021
Rastriya Academy School, Chitradurga	80.32%

Technical Skills

- **AWS Cloud:** Amazon EC2, Amazon S3, IAM, VPC, Route 53, Elastic Load Balancing, CloudWatch fundamentals
- **AWS Operations:** Static website hosting, DNS configuration concepts, access permissions, resource monitoring, backup, disaster recovery, failover routing
- **Contact Center Concepts:** IVR, call routing, queues, contact flows, voice prompts, call dispositions, omnichannel support concepts
- **Integration Concepts:** REST APIs, API request and response handling, JSON, AWS service integrations, troubleshooting integration issues
- **Databases:** SQL, MySQL, DBMS, database queries, data validation, reporting
- **Operating Systems:** Linux fundamentals, command-line operations, file permissions, processes, and services
- **Programming and Scripting:** Python fundamentals, basic scripting, HTML, CSS, PHP
- **DevOps and Tools:** Learning Git, GitHub, CI/CD concepts, YAML fundamentals, Microsoft Excel, MS Office
- **Support and Communication:** Troubleshooting, incident management fundamentals, technical documentation, analytical thinking, written and oral communication

Cloud Computing and DevOps Training

Cloud Computing and DevOps Course	Ongoing
• Completed hands-on learning of AWS services including Amazon EC2, S3, IAM, VPC, Route 53, load balancing, backup, and disaster recovery concepts. • Practiced configuring cloud resources, access permissions, DNS records, traffic routing, and basic monitoring concepts. • Studied contact-center concepts including IVR, call routing, queues, contact flows, voice prompts, and customer interaction journeys. • Learning JSON data handling, system integrations, Linux administration, Python fundamentals, Git, GitHub, and CI/CD workflows. • Developing troubleshooting, technical documentation, reporting, and continuous-improvement skills for cloud and application support environments.	

Cloud Projects

Static Website Hosting and DNS Configuration

Technologies: Amazon S3, Route 53, IAM, HTML, CSS

- Created a static website using HTML and CSS and hosted the website files in an Amazon S3 bucket.
- Configured Amazon S3 static website hosting and uploaded website assets for public web access.
- Registered a domain and used Amazon Route 53 concepts to configure DNS routing for the hosted website.

- Applied IAM and S3 permission concepts while managing access to website resources.
- Tested website availability, DNS resolution, and access behavior after deployment.

EC2 Backup, Disaster Recovery, and Route 53 Failover Design

Technologies: Amazon EC2, AWS Backup, Elastic Disaster Recovery, Route 53, Elastic Load Balancing

- Designed an automated backup and disaster recovery solution for an Amazon EC2-based application.
- Planned recovery procedures using AWS Backup and AWS Elastic Disaster Recovery concepts.
- Designed equivalent primary and disaster recovery environments for application continuity.
- Configured a Route 53 failover routing approach to direct traffic from the primary environment to the DR environment.
- Incorporated load-balancing concepts for traffic distribution and application availability.
- Documented recovery steps, failover scenarios, operational dependencies, and validation checks.

Academic Project

Student Project Repository System (SPARK)

Technologies: PHP, MySQL, HTML, CSS

- Developed a web-based application to manage and organize student academic projects.
- Designed and managed a MySQL database for project, user, and verification records.
- Implemented role-based login functionality for controlled access to system features.
- Added filtering and verification functions to improve project search and system management.
- Applied debugging, database management, data validation, technical documentation, and problem-solving skills.

Experience

Assistant Accountant Intern (Part-time)

6 Months

SLV Super Market, Ujire

- Maintained daily accounting entries and financial records with accuracy.
- Tracked sales, purchases, expenses, and transaction details using structured data records.
- Verified invoices, vouchers, and supporting documents to maintain data quality.
- Performed data entry and reconciliation using Microsoft Excel.
- Supported inventory-related documentation and operational record management.
- Prepared reports and maintained clear documentation for daily business operations.
- Demonstrated attention to detail, analytical thinking, task ownership, and process discipline.

Certifications

- Database and SQL – Infosys
- Build a Responsive Website with HTML and CSS – Infosys Springboard
- Web Content Management – Infosys
- Enhancing Communication – Coursera, 2025

Additional Information

Professional Strengths: Problem Solving, Troubleshooting, Analytical Thinking, Technical Documentation, Written Communication, Oral Communication, Attention to Detail, Adaptability, Teamwork, Continuous Learning

Languages: English, Kannada, Tamil

Target Role: AWS Connect Support Engineer
